

Risk Management

The Aquis Search Risk team delivers specialist recruitment solutions to the corporate, legal and financial markets. Our experienced consultants have an in-depth knowledge and understanding of the risk sector and provide a range of advisory services including market insights and salary information.

Given the current economic climate much of the vocabulary of risk management is well established. At Aquis we understand the need for organisations to create a culture where risk management: is part of the decision making process, addresses uncertainty in a systematic and structured way, and creates value based on the best information available.

We work with applicants who have the ability to develop and implement risk management as an integral part of our client's organisational processes. The Aquis Search Risk team provides opportunities for dynamic and responsive professionals to work with organisations that are building transparent and inclusive risk management cultures, capable of continual improvement and enhancement.

We partner with the leading names within each of the industries we serve and have developed long standing relationships with our clients. By focusing on areas of business where our skills and resources deliver timely and effective solutions we connect talent with opportunity in a complex global market.

Typical assignments include:

- Market Risk
- Credit Risk
- Operational Risk
- Quantitative Finance
